

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Specifications and Advertisement for Bids for 12,000-Gallon Portable Water Tank

MEETING DATE: October 6, 1993

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council approve the specifications for the above project and authorize advertising for bids.

BACKGROUND INFORMATION: This project consists of furnishing one 12,000-gallon, trailer mounted, water tank. This tank will be used in back flushing the carbon filters located at water Well 16. A portable tank has been chosen over the fixed-location tank that was specified with the carbon filters. Back flushing the carbon filters is an intermittent task and the water tank will be available for other duties when not used for back flushing. Should other carbon filters be installed at additional wells, this tank could also be used to back flush these filters instead of building a fixed-location tank at each additional well site.

FUNDING: Originally Budgeted: 1993
Budgeted Fund: State loan for DBCP treatment
Current Appropriation: \$4,758,000
Total Project Estimate: \$30,000 (for water tank only)
Bid Opening Date: October 27, 1993

Jack L. Ronsko
Public Works Director
